Control of Brown Patch/Large Patch \textit{(Rhizoctonia solani)} in Established Turfgrass

\textbf{ATTENTION}

\textit{†}This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to the container for Eagle\textsuperscript{®} 40WP specialty fungicide before applying. Carefully follow all precautionary statements and applicable use directions except as specified below.
- Use of Eagle 40WP according to this Section 2(ee) recommendation is subject to all use precautions and limitations imposed by the label affixed to the container for Eagle 40WP.

\textbf{Directions for Use}

Refer to product label for Eagle 40WP for Use Precaution, Mixing Directions and Application Directions.

Use Eagle 40WP to control brown patch/large patch \textit{(Rhizoctonia solani)} in established residential and non-residential turfgrass.

In established residential and non-residential turfgrass, apply 0.6 oz per 1000 sq ft. Begin applications when conditions are favorable for disease development and before disease symptoms are apparent. If disease is present, mix Eagle 40WP with an EPA registered contact fungicide, such as Fore\textsuperscript{®} T/O fungicide. The application interval is 14 days. Do not apply more than 36 oz of Eagle 40WP per 5000 sq ft per year (12, 3-oz packets per year). For Nassau and Suffolk Counties in New York State, do not apply more than 9 oz of Eagle 40WP per 5000 sq ft per year (1.95 lb myclobutanil per acre).

Read the label affixed to the container for Eagle 40WP and follow all use directions, precautions, and restrictions.
