Directions for Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of pesticide application.
- Apply Accord XRT II using a 3.75% to 7.5% solution in a low-volume, directed spray application on actively growing plants with fully expanded fronds for control of hayscented fern (*Dennstaedtia punctilobula*), New York fern (*Thelypteris noveboracensis*), and bracken fern (*Pteridium aquilinum*) within forested sites.
- Apply to target species between frond maturation and frond senescence, roughly June 15th to October 15th. Timing and application rates may vary within these parameters, depending upon the specific species of fern being controlled and the local site conditions.
- The use of colorants, dyes, and/or surfactants must comply with the information on the product label.
- Follow all applicable directions, restrictions, and precautions on the product label.
- Do not apply to open water such as lakes, reservoirs, rivers, streams, creeks, salt water bays, or estuaries, as directed on the Accord XRT II product label.
- The recommended rate of this product may be used in a tank mix with the DuPont Oust XP Herbicide (EPA Reg. No. 352-601) for forestry site preparation to control hayscented fern and/or New York fern.
- Do not apply more than 8 quarts of Accord XRT II per acre per year.
