FIFRA 2(ee) Recommendation for the Control of Hayscented Fern, New York Fern and Bracken Fern within Forestry Sites

Rodeo
EPA Reg. No. 62719-324

Directions for Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of pesticide application.
- Apply Rodeo in one of the following spray methods for control of hayscented fern, New York fern, and bracken fern within forestry sites:
  - Low-volume, directed spray: Apply a 3.75% to 7.5% solution
  - Spray-to-wet: Apply a 0.75% to 1.5% solution
- Apply to actively growing plants with fully expanded fronds, roughly June 15th to October 15th. Timing and application rates may vary within these parameters, depending upon the specific species of fern being controlled and the local site conditions.
- The use of colorants, dyes, and/or surfactants must comply with the information on the product label.
- Follow all applicable directions, restrictions, and precautions on the product label.
- Do not apply more than 8 quarts of Rodeo per acre per year.
