FIFRA 2(ee) Recommendation for the Control of Sticky Sage (*Salvia glutinosa*)

Roundup Custom for Aquatic & Terrestrial Use

EPA Reg. No. 524-343

**Directions for Use**

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- This recommendation must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, and precautions on the product label.
- For control of sticky sage, applications can be made at all sites listed on the Roundup Custom for Aquatic & Terrestrial Use product label. A permit may be required to apply this product in aquatic sites.
- For best results, applications should be made during periods of active growth.
- Follow all applicable maximum seasonal and per application use rate limits for each use site listed on the Roundup Custom for Aquatic & Terrestrial Use product label.

**Foliar Application**

- Apply a 1-5% solution of Roundup Custom for Aquatic & Terrestrial Use.
- For spray-to-wet applications, spray coverage should be uniform and complete. Do not spray to the point of runoff. Use coarse sprays only.
- For low-volume directed spray applications, spray coverage should be uniform with at least 50 to 75 percent of the foliage contacted. Coverage of the top one half of the plant is important for best results. To ensure adequate spray coverage, spray both sides of large or tall woody brush and trees, when foliage is thick and dense, or where there are multiple sprouts. For best results, apply to actively growing woody brush and trees after full leaf expansion.
