FIFRA 2(ee) Recommendation for the Control of Sticky Sage (*Salvia glutinosa*)

**Roundup Pro Herbicide**

EPA Reg. No. 524-475

**Directions for Use**
- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- This recommendation must be in the possession of the user at the time of pesticide application.
- Follow all applicable directions, restrictions, and precautions on the product label.
- For control of sticky sage, applications can be made at all sites listed on the Roundup Pro Herbicide product label.
- For best results, applications should be made during periods of active growth.
- Follow all applicable maximum seasonal and per application use rate limits for each use site listed on the Roundup Pro Herbicide product label.

**Foliar Application**
- Apply a 1-5% solution of Roundup Pro Herbicide.
- For spray-to-wet applications, apply to foliage of vegetation. Do not spray to the point of runoff. Spray coverage should be uniform and complete. Use coarse sprays only.
- For low volume directed spray applications, spray coverage should be uniform with at least 50 percent of the foliage contacted. Coverage of the top one-half of the plant is important for best results. To ensure adequate spray coverage, spray both sides of large or tall woody brush and trees, when foliage is thick and dense, or where there are multiple resprouts.
