For Control of Seed Maggots in Snapbeans

ATTENTION

- It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Lorsban* 15G insecticide before applying. Carefully follow all precautionary statements and applicable use directions.
- Use of Lorsban 15G according to this supplemental labeling is subject to all use precautions and limitations imposed by the label affixed to the container for Lorsban 15G.

Directions for Use

For seed maggot control in snapbeans, apply Lorsban 15G at a rate of 6 oz per 1000 ft of row at a 30-inch row spacing (6.7 pounds per acre). For at-plant treatment, place the Lorsban 15G granules in-furrow.

Restrictions

- **Do not** make more than one application per year.
- **Do not** apply more than 6.7 lbs. of Lorsban 15G per acre.
- **Do not** apply Lorsban 15G at-plant if the field was treated with a preplant incorporated treatment of Lorsban 4E

Precaution: Granular insecticides, including Lorsban 15G, may contribute to the stress of the snapbean plant under certain environmental conditions. This stress may reduce plant stand or interfere with normal plant development. Herbicides used preplant incorporated may interact with insecticides and enhance this stress.

Expiration Date: This label is valid until December 31, 2002 or until otherwise amended, withdrawn, canceled, or suspended.
