Dear Mr. Baxter:

Re: FIFRA 2(ee) Recommendation for the use of Lorsban-4E (EPA Reg. No. 62719-220)

The Department of Environmental Conservation has approved your FIFRA 2(ee) Recommendation for the use of **Lorsban-4E (EPA Reg. No. 62719-220)** allowing preplant broadcast application for the control of seed maggots in succulent or dried legume vegetables (except soybean).

Enclosed is the stamped "accepted" copy of the recommendation as it is to appear in the Cornell Pest Management Guidelines. If you have any questions regarding this letter please contact me at 518-402-8768.

Sincerely,

Shaun M. Peterson

RESTRICTED USE PESTICIDE

For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator's certification.

Lorsban®-4E

EPA Reg. No. 62719-220

Special 2(ee) Recommendation†

Control of Seed Maggots in Succulent or Dried Legume Vegetables (Except Soybean)†

ATTENTION

†This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or approved by EPA.

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- Read the label affixed to the container for Lorsban®-4E insecticide before applying. Carefully follow all precautionary statements and applicable use directions except as specified below.
- Use of Lorsban-4E according to this Section 2(ee) recommendation is subject to all use precautions and limitations imposed by the label affixed to the container for Lorsban-4E.

Directions for Use

†Including, but not limited to: Adzuki Bean, Bean, Blackeyed Pea, Broad Bean (Dry and Succulent), Catjang, Chickpea, Cowpea, Crowder Pea, English Pea, Field Bean, Field Pea, Garden Pea, Grain Lupin, Green Pea, Guar, Lima Bean (Dry and Green), Kidney Bean, Lablab Bean, Lentil, Moth Bean, Navy Bean, Mung Bean, Pea, Pigeon Pea, Pinto Bean, Rice Bean, Southern Pea, Sweet Lupin, Tepary Bean, Urd Bean, White Lupin, White Sweet Lupin

Refer to product label for Lorsban-4E for General Use Precautions, Mixing and Application instructions.

Apply Lorsban-4E at a rate of 2 pints per acre to control seed maggots. Make a preplant broadcast application in a minimum of 10 gallons of spray per acre to the soil surface using suitable ground equipment. To improve the activity against seed maggots, Lorsban-4E must be incorporated into the top 1 to 3 inches of soil using suitable tillage equipment.

Specific Use Precautions:

Insecticides, including Lorsban-4E, may contribute to the stress of plants under certain environmental conditions. This stress may reduce plant stand or interfere with normal plant development. Herbicides used preplant incorporated may interact with insecticides and enhance this stress.

Specific Use Restrictions:

- Do not make more than 1 application of Lorsban-4E per year.
- Do not apply more than 2 pints of Lorsban-4E per acre.
- Do not enter or allow worker entry into treated areas during the restricted entry interval of 24 hours unless PPE for early entry is worn.
