Due To Toxicity To Fish and Aquatic Organisms
For retail sale to and use only by Certified Applicators or persons under their direct supervision and only for those uses covered by the Certified Applicator’s certification.

CONTROL OF KUDZU BUG ON SOYBEANS IN NEW YORK

<table>
<thead>
<tr>
<th>Crop</th>
<th>Pest</th>
<th>Rate (3b. ai./A)</th>
<th>Rate (fl.oz./A)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Soybeans</td>
<td>Kudzu Bug</td>
<td>0.025 – 0.03</td>
<td>3.20 – 3.84 oz./A</td>
</tr>
</tbody>
</table>

Do not apply more than 0.06 lb. ai. (0.48 pts)/A per season. Do Not apply within 30 days of harvest.

Direction For Use:
Apply as required by scouting, usually at intervals of 5 or more days. Timing and frequency of applications should be based upon insect populations reaching locally determined economic thresholds.

Do not graze or harvest treated soybean forage, straw or hay for livestock.

Apply with ground or air equipment using sufficient water and application methods to obtain full coverage of all plant parts. When applying by air, apply in a minimum of 2 gallons total solution per acre. When applying by ground, a minimum of 10 gallons of solution per acre is recommended.

THIS RECOMMENDATION, (USE INFORMATION IN ACCORDANCE WITH SECTION 2(EE) OF FIFRA), IS IN ADDITION TO THE FEDERAL LABEL PRINTED ON THE CONTAINER. Follow all applicable directions, restrictions, and precautions on this recommendation and the main EPA registered label. It is a violation of federal law to use this product in a manner inconsistent with its labeling recommendation. This 2(ee) recommendation and the federal label for this product must be in the possession of the user at the time of pesticide application.
