only for those uses covered by the Certified Applicator's certification.

FIFRA Section 2(ee) Recommendation

ACCEPTED

FOR DISTRIBUTION AND USE ONLY IN THE STATE OF NEW YORK

EPA Reg. No. 59639-35

DANITOL® 2.4 EC SPRAY FOR USE ON BLACK STEM BORER IN POME FRUIT

This FIFRA section 2(ee) recommendation expires on December 31, 2019.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or
approved by the EPA. This 2(ee) recommendation contains directions for use which do not appear on the
package label and must be in the possession of the user at the time of pesticide application. Follow all
applicable directions, restrictions and precautions on the EPA registered label when using Danitol 2.4 EC Spray.
Always read and follow all label directions when using any pesticide alone or in tank mix combinations. The
most restrictive labeling applies when using a tank mix.

<tbody>
<tr>
<td>Black Stem Borer</td>
<td>16 to 21-1/3 fl oz/A (0.3 to 0.4 lb ai/A)</td>
<td>Make foliar applications of Danitol 2.4 EC when black stem borer adults are actively flying in the perimeter and within the orchard. Apply by ground with airblast equipment as a full coverage spray or apply by air in a minimum of 10 gals/A and repeat as needed to maintain control but not more often than every 10 days. Resistance Management: It is generally recommended that no more than two Danitol 2.4 EC Spray applications be made per season as part of a Resistance Management Program. Use non-pyrethroid products at other timings to control pests.</td>
