PORTAL® Miticide/ Insecticide
EPA Reg. No. 71711-19

For Additional Pest in Berries: For Control of Cyclamen Mite and at Higher Gallonage

Directions for Use

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

This labeling and the EPA-approved container label must be in the possession of the user at the time of application.

Notice: Before using this product, read the First aid, Precautionary Statements, Conditions of Sale and Warranty, and complete “Directions for Use” found on the container labeling. All applicable directions, restrictions, and precautions on EPA-registered labels are to be followed.

LOW-GROWING BERRIES (subgroup 13-07G): bearberry, bilberry, lowbush blueberry, cloudberry, cranberry, ligonberry, muntries, partridgeberry, strawberry, cultivars, varieties and/or hybrids of these*

*NOTE: Temporary pinking of immature green berries may be observed after a PORTAL miticide/insecticide application on certain strawberry varieties. This effect is transient and does not affect fruit sizing, color or quality. Avoid puddling of spray solution on plastic mulch as this can potentially result in underside scarring of fruit in direct contact with the plastic.
