FIFRA 2(ee) Recommendation

Researcher and Title:
Abby Seaman, MS
Vegetable IPM Coordinator
NYS IPM Program
Cornell University
630 W. North St.
Geneva, NY 14456
315-787-2422
ajs32@cornell.edu

Pesticide Name and EPA Registration No.:
Entrust SC (EPA Reg. No. 62719-621)

Target Crops:
Squash (summer and winter), pumpkin, cucumber, muskmelons, and edible gourds

Target Pest:
Squash vine borer, Melittia cucurbitae

Complete Recommendation as it will appear in Cornell Guidelines:
Application of two to three treatments of Entrust SC at 4-8 fluid ounces per acre (5-7 days apart) during the three week egg-laying period around 1000 DD_{50} will control squash vine borers before they become protected by the vines.
