<td>Grape Tumid Gallmaker</td>
<td>6.0 – 8.0</td>
</tr>
</tbody>
</table>

Notes and Restrictions
Pre-Harvest Interval (PHI): 7 days.
Minimum interval between applications: 30 days.
Maximum MOVENTO allowed per crop season: 12.5 fluid ounces/Acre (0.2) lb ai/A.
Some adjuvants that may be used with MOVENTO have caused intolerable damage to grape berries / clusters when applied alone or in mixes after the initiation of bloom. Testing has shown that MOVENTO does not increase the potential for damage when used in combination with such adjuvants; however, not all adjuvants have been tested. It is recommended that a high quality spreading-penetrating adjuvant be used at a rate that is known to be safe to the crop.

For MEDICAL And TRANSPORTATION Emergencies ONLY Call 24 Hours A Day 1-800-334-7577
For PRODUCT USE Information, Call 1-866-99BAYER (1-866-992-2937)

As with any crop-protection product, always read and follow label directions.
