<td>Erineum Mite</td>
<td>6.0 – 8.0</td>
<td>0.10 - 0.13</td>
</tr>
</tbody>
</table>

Restrictions
Pre-Harvest Interval (PHI): 7 days.
Minimum interval between applications: 30 days.
Maximum MOVENTO allowed per 12-month period: 12.5 fluid ounces/Acre (0.2 lb ai/Acre).

Some adjuvants that may be used with MOVENTO have caused intolerable damage to grape berries / clusters when applied alone or in mixes after the initiation of bloom. Testing has shown that MOVENTO does not increase the potential for damage when used in combination with such adjuvants; however, not all adjuvants have been tested. It is recommended that a high quality spreading-penetrating adjuvant be used at a rate that is known to be safe to the crop.
