Supplemental Labeling
Prentox Prenfish Toxicant
Liquid Emulsifiable
EPA Reg. No. 655-422

EPA 24(c) Special Local Need Registration SLN NY-080011
(For Distribution and Use Only in the State of New York)

For Control of Invasive Fish Species in Lakes, Ponds, Streams, Rivers
and Associated Areas of Standing Water

ATTENTION
- It is a violation of Federal law to use this product in a manner inconsistent
  with its labeling.
- This labeling must be in the possession of the user at the time of application.
- Read the label affixed to the container for Prentox Prenfish Toxicant before
  applying. Carefully follow precautionary statements and applicable use
  directions.
- This product may only be used for purposes specifically described in a valid
  permit issued by the New York State Department of Environmental
  Conservation in accordance with 6 NYCCR Part 328.
- Use of Prentox Prenfish Toxicant according to this supplemental labeling is
  subject to all use precautions and limitations imposed by the label affixed to
  the product container.

Directions for Use
For control of invasive fish species, such as the Northern Snakehead, the
appropriate application rate will depend on such factors as pH,
temperature, depth and turbidity. Use this product only at locations,
rates, and times authorized and approved by appropriate state and
federal fish and wildlife agencies. Application rates of 0.10 ppm (0.005
ppm rotenone) to 5.0 ppm (0.250 ppm rotenone) for invasive fish species
will be allowed. The application rate will be dictated by conditions in
the 6NYCRR Part 328 permit.

DELIVERY CONFIRMATION

Mr. Jeffrey S. Miller
Prentiss Incorporated
C.B. 2000 (21 Vernon Street)
Floral Park, New York 11002-2000

Dear Mr. Miller:

Re: Registration of Special Local Need Labeling for Prentox Prenfish Toxicant
(EPA Reg. No. 655-422) Assigned SLN No. NY-080011

The Department has reviewed your application to register Special Local Need (SLN) labeling for Prentox Prenfish Toxicant (EPA Reg. No. 655-422) in New York State. The product contains the active ingredient rotenone (chemical code 071003) and is Federally labeled for use in fisheries management for the eradication of fish from lakes, ponds, reservoirs and streams.

According to 6 NYCRR Part 328, the dosage rate for Prentox Prenfish Toxicant is not to exceed 0.5 ppm to 1.0 ppm. An emergency regulation has been promulgated that modifies subdivision 328.6(c) of 6 NYCRR to allow a dosage above 1.0 ppm.

The SLN labeling is for control of invasive fish species, such as the Northern Snakehead, in lakes, ponds, streams, rivers and associated areas of standing water. The product is to be used only at locations, rates, and times authorized and approved by appropriate state and federal fish and wildlife agencies. Application rates of 0.10 ppm (0.005 ppm rotenone) to 5.0 ppm (0.250 ppm rotenone) for invasive fish species will be allowed. The application rate will be dictated by conditions in the 6 NYCRR Part 328 permit.

The Department hereby grants, under the authority of Section 24(c) of FIFRA, a Special Local Need registration for Prentox Prenfish Toxicant (EPA Reg. No. 655-422) for control of invasive fish species at rates up to 5.0 ppm (0.250 ppm rotenone). The Special Local Need labeling is assigned SLN No. NY-080011 and expires as of December 31, 2008.

The Certificate of Pesticide Registration and a copy of the New York State stamped “ACCEPTED” SLN labeling for Prentox Prenfish Toxicant (SLN No. NY-080011) are enclosed for your records.

The product, Prentox Prenfish Toxicant (SLN No. NY-080011), is classified as a Federally “Restricted Use Pesticide” and, as noted on the “restriction” column on the certificate, is classified as “restricted use” in New York State under rules and regulations 6NYCRR 326. As such, this product is restricted in its purchase, distribution, sale, use, and possession in New York State.
According to New York State Department of Environmental Conservation Regulations 6 NYCRR 326.3(a): “It shall be unlawful for any person to distribute, sell, offer for sale, purchase for the purpose of resale, or possess for the purpose of resale, any restricted pesticide unless said person shall have applied for, and been issued a commercial permit.”

Should you require information to obtain a commercial permit, please contact the Pesticide Reporting & Certification Section, at (518) 402-8748.

The Pesticide Reporting Law (PRL) in the Environmental Conservation Law Article 33 Title 12 requires all certified commercial pesticide applicators to report information annually to the Department regarding each pesticide application they make. Commercial pesticide retailers are required to report all sales of restricted pesticide products and sales of general use pesticide products to private applicators for use in agricultural crop production. If no sales are made within New York State, a report still must be filed with the Department indicating this is the case.

If you need information relating to the Pesticide Reporting Law, or annual report forms, please visit the Department’s website at http://www.dec.ny.gov/chemical/27506.html or call (518) 402-8748.

The SLN labeling specifies the use directions, limitations, conditions and maximum application rates which must be followed in order for Prentox Prenfish Toxicant to be legally used in New York State. All precautionary statements, applicable use directions, use precautions and limitations of the labeling affixed to the Prentox Prenfish Toxicant product container must be followed.

Please be reminded that a copy of the accepted SLN label must be in the possession of the user at the time of pesticide application.

Please contact Ms. Jeanine Broughel, of our Pesticide Product Registration Section, at (518) 402-8768, if you have any questions.

Sincerely,

Maureen P. Serafini
Director
Bureau of Pesticides Management
