FOR DISTRIBUTION AND USE ONLY IN THE STATE OF NEW YORK UNDER SECTION 18 EMERGENCY EXEMPTION

This labeling must be in possession of the user at the time of pesticide application. It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Read entire Directions for Use and Disclaimer of Warranties before using this product. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the registered product label for MOVENTO®. (EPA Registration Number: 264-1050).

Any adverse effects resulting from the use of MOVENTO® under this Section 18 Emergency Exemption must be immediately reported to the New York Department of Environmental Conservation.

EFFECTIVE PERIOD:
This Section 18 Emergency Exemption becomes effective January 17, 2012 and expires on September 15, 2012. A maximum of 13,000 acres of dry bulb onions may be treated in New York.

<td>Onion (bulb)</td>
<td>Onion thrips</td>
<td>5.0</td>
</tr>
</tbody>
</table>

Notes and Restrictions:
Pre-Harvest Interval (PHI): 7 days

Minimum interval between applications: 7 days

Maximum MOVENTO allowed per crop season: 10 fluid ounces/Acre of formulated product (0.16 lb ai/A)

Onions must be harvested prior to bloom.

Do not apply more than two applications per acre per season.

MOVENTO can be applied by air or ground equipment.

To minimize drift to adjacent fields, use ground applications whenever possible.

To the extent possible, local beekeepers should be notified prior to applying this chemical.

Observe all Environmental Hazards contained on the Section 3 label.

Apply specified dosage of MOVENTO as needed for control. Treatment must be made when thrips populations begin to build and before a damaging population becomes established. Best results will be obtained when two applications are made on a 7-10 day interval, incorporated into a seasonal program where effective products with different modes of action are utilized in rotational sequences for management of thrips populations. MOVENTO must be tank-mixed with a spray adjuvant having spreading and penetrating properties to maximize leaf uptake and systemicity of the active ingredient within treated plants; please contact your local Bayer CropScience representative or PCA for specific recommendations.

For MEDICAL And TRANSPORTATION Emergencies ONLY Call 24 Hours A Day 1-800-334-7577
For PRODUCT USE Information Call 1-866-99BAYER (1-866-992-2937)

As with any crop-protection product, always read and follow label directions.
For additional information call toll-free 1-866-99BAYER (1-866-992-2937).
Bureau of Pesticides Management
New York Department of Environmental Conservation

Date Issued: JAN 17 2012
Expiration Date: September 15, 2012
Report Due: March 15, 2013
File Symbol: 12-NY-02

Attn: Cyndi Crowley

The Environmental Protection Agency hereby issues a specific exemption under the provisions of section 18 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended, to the New York Department of Environmental Conservation for the use of spirotetramat (CAS Reg. No. 203313-25-1), formulated as the product Movento, to control thrips on dry bulb onions in New York.

Conditions of this exemption are given below:

1. The New York Department of Environmental Conservation (NYDEC) is responsible for ensuring that all provisions of this specific exemption are met. NYDEC is also responsible for providing information in accordance with 40 CFR 166.32. Accordingly, a report summarizing the results of this program must be submitted to EPA Headquarters and the EPA Region 2 office by March 15, 2013 or prior to requesting another specific exemption for this use. In accordance with 40 CFR 166.32(a), these offices shall also be immediately informed of any adverse effects resulting from the use of this pesticide in connection with this exemption.

Refer to file symbol 12-NY-02 in any future correspondence regarding this exemption.

2. Movento (22.4% spirotetramat, EPA Reg. No. 264-1050), manufactured by Bayer CropScience, may be applied to control thrips on dry bulb onions as provided in this authorization. All applicable directions, restrictions, and precautions on the Section 3 label and the proposed section 18 use directions submitted with your application, except as modified by this authorization, must be followed.

3. Movento may be applied by ground or air equipment. The maximum rate for each application is 5.0 fluid ounces of formulated product per acre (0.08 lbs ai/acre). No more than two applications are permitted per acre per season. The maximum seasonal application rate is 10 fluid ounces of formulated product per acre (0.16 lbs ai/acre).

4. A maximum of 13,000 acres of dry bulb onions may be treated in New York.

5. Onions must be harvested prior to bloom and a 7-day preharvest interval (PHI) must be
observed.

6. The emergency use is not expected to result in residues of spirotetramat and its metabolites calculated as spirotetramat equivalents, in or on onion, bulb, subgroup 3A-07 exceeding the currently established tolerance of 0.30 ppm.

7. Available data suggest that this material may be hazardous to honey bee brood. The Section 3 label carries a bee hazard statement which is included in this program. In addition, the following measures must be included on the section 18 use directions:

   • To minimize drift to adjacent fields, use ground application whenever possible;
   • To the extent possible, local beekeepers should be notified prior to applying this chemical.

Progress toward registration is adequate at this time.

This is the fourth year that the NYDEC has requested an exemption for this use. In the event that an exemption for this use is requested next year, EPA is making a preliminary determination that this use is eligible for the re-certification program (40 CFR 166.20(b)(5)) in 2013.
